ABOUT ME

Results-driven Backend Developer with hands-on experience in Python, Django, and Django REST Framework (DRF), specializing in building secure, scalable RESTful APIs. Skilled in JWT authentication, CRUD operations, and database management (PostgreSQL/MySQL), with a strong focus on clean coding practices, backend architecture, and API integration. A quick learner with a problem-solving mindset committed to delivering reliable and high-performance web applications.

EDUCATION

Superior University

2022 – 2026

Bachelor of Science in Computer Science

Coursework: OOP, DBMS, DSA, Software Engineering, Web Development.

Focused on backend development, REST API design, database management, and software development through academic projects and practical learning.

PROJECTS

Student Feedback Analysis System

- Developed a secure Student Feedback Management System using Django and DRF.
- Built RESTful APIs with authentication and role-based access control.
- Designed MySQL database models and tested APIs using Postman.
- Clean and version-controlled code maintained using Git & GitHub.

E-Commerce REST API

- Developed RESTful APIs for products, carts, orders, and user management.
- Implemented JWT authentication and role-based access control.
- Designed relational database models for cart and order processing.
- Added search, filtering, and pagination features for products.
- APIs tested and documented using Postman.

SKILLS

Technical Skills: Python — Django — Django REST Framework (DRF) — RESTful API Development — JWT Authentication — MySQL — SQLite — Git & GitHub — Postman

Soft Skills: Problem Solving — Time Management — Multitasking — Creativity — Team Collaboration
